

# SALI LABS

## Institutional Governance Charter

Version 1.0 — 2026

---

### 1. Foundational Statement

Sali Labs is established as an independent strategic research initiative dedicated to structural engineering intelligence, infrastructure resilience systems, and AI-assisted analytical frameworks. The institution operates under principles of intellectual independence, methodological rigor, and long-horizon strategic responsibility.

### 2. Institutional Purpose

The primary mission of Sali Labs is to advance structural and infrastructure intelligence research; develop probabilistic and systems-based analytical frameworks; support sovereign-scale infrastructure strategy through rigorous modeling; and promote resilience-oriented engineering methodologies. Sali Labs functions as an analytical and intellectual platform and does not represent a governmental, academic, or corporate entity unless formally declared.

### 3. Governance Structure

Sali Labs operates under a centralized governance model led by its Founder & Strategic Director. Strategic direction, research scope, and analytical integrity remain internally governed unless defined by formal written collaboration agreements.

### 4. Research Independence

All research conducted under Sali Labs is free from political or external institutional influence, maintains analytical neutrality, operates under transparent methodological standards, and discloses formal collaboration structures where applicable.

### 5. Ethical and Professional Standards

Sali Labs adheres to engineering ethics principles, academic integrity standards, responsible risk communication, and transparent methodological documentation.

## 6. Conflict of Interest Policy

Any advisory engagement, partnership, or research sponsorship is documented transparently where applicable. Conflicts of interest, if present, are disclosed in associated documentation.

## 7. Intellectual Property

All analytical frameworks, publications, methodologies, and institutional documentation produced under Sali Labs are protected under applicable intellectual property principles. Unauthorized reproduction or institutional misrepresentation is strictly prohibited.

## 8. Institutional Status

Sali Labs currently operates as an independent research initiative. Future legal structuring or formal registration may occur under applicable jurisdictional frameworks.
